

The role of Energy Management System for heating consumption in office buildings – a case study of the Danish Building and Property Agency

Esmir Maslesa

Industrial PhD student, DTU & KMD

Technical
University of
Denmark

AALBORG UNIVERSITY
DENMARK

4th International Conference on Smart Energy
Systems and 4th Generation District Heating 2018
#SES4DH2018

4DH

**4th Generation District Heating
Technologies and Systems**

BUILDINGS

36% of global energy

40% CO₂ emissions

NON-RESIDENTIAL

At least 40% higher

Environmental impacts during
buildings' life cycle

■ Construction ■ Use ■ Demolition

Maslesa et al. (2018)

Governmental real estate agency

4.000.000 m² – over 800 buildings

Universities, State properties, Private leases

800.000 m² office buildings

IWMS (5 modules) + integrations (EMS)

Consistent, valid data across organisation

Knowledge-based decision making

EMS

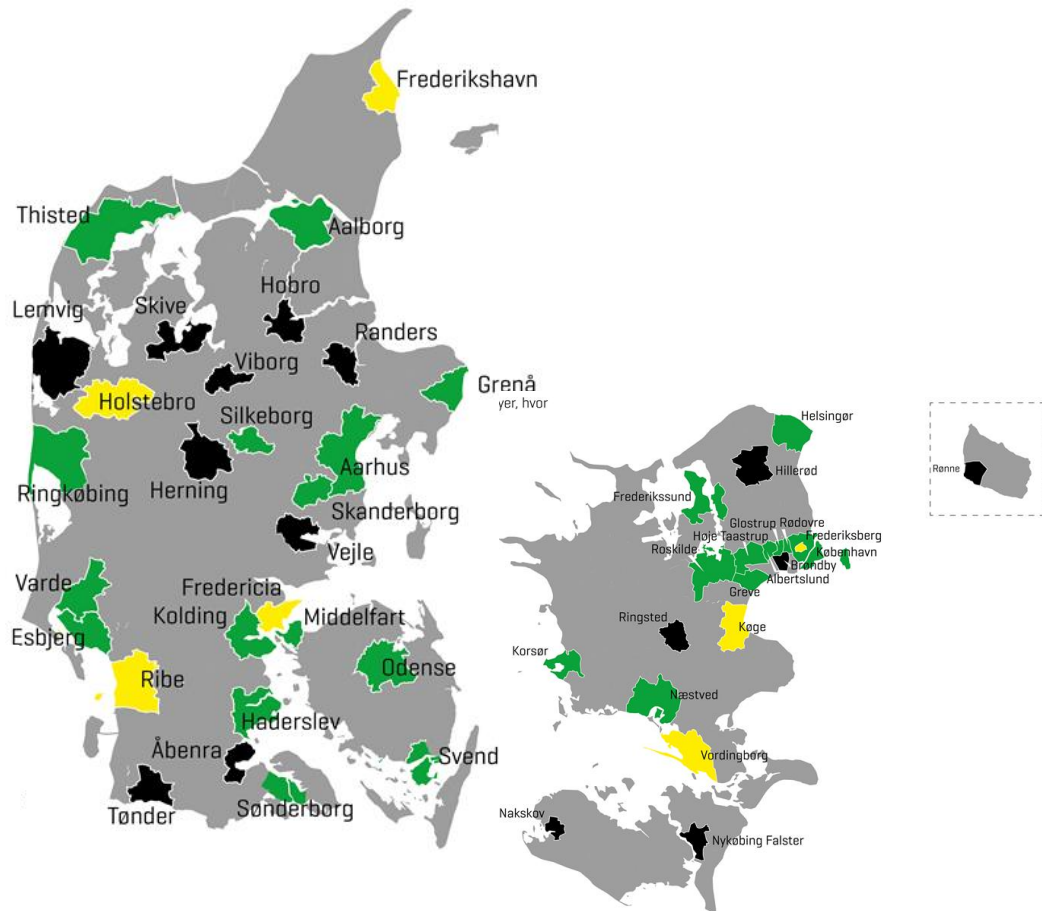

DATA COLLECTION

Status on heating data
from the cities in which
BYGST has its buildings

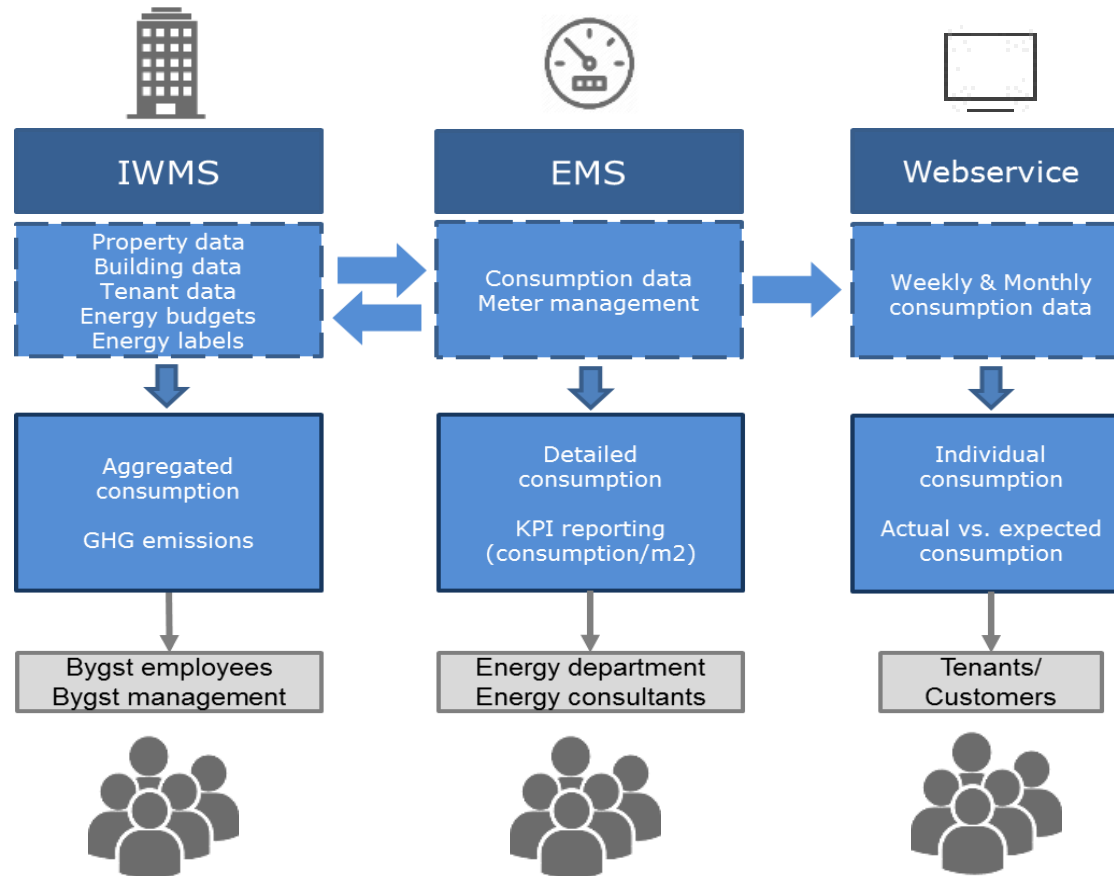

October 2018

Source: Bygningsstyrelsen

Traffic light model

HOFOR & Bygningsstyrelsen

Red, Yellow, Green and Green plus

Red > 130 kWh/m²
Yellow = 100-130 kWh/m²
Green = 70-100 kWh/m²
Green Plus < 70 kWh/m²

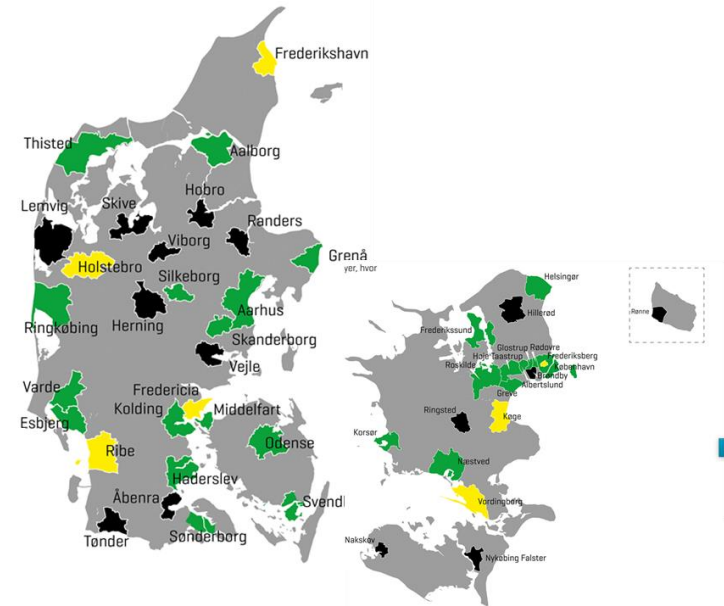

|  Varmemærker 2017 | | | | | |
|---|--------------------------------------|---|---------------------------|--|--------------------------|
| Ejendom | Adresse | Mærke | Forbrug | Tendens | Areal |
|  | Zahrtmannsvej 44 3700 Rønne |  | 47 kWh/m ² |  52 kWh/m ² → 47 | 2.762 m ² |
|  | Howitzvej 32 2000 Frederiksberg |  | 41 kWh/m ² |  41 kWh/m ² → 41 | 9.011 m ² |
|  | Birkelundsvej 2 2620 Albertslund |  | 77 kWh/m ² |  85 kWh/m ² → 77 | 10.276 m ² |
|  | Egegårdsvej 75 2610 Rødovre |  | 134 kWh/m ² |  153 kWh/m ² → 134 | 1.264 m ² |
|  | Artillerivej 131 2300 København S |  | 160 kWh/m ² |  162 kWh/m ² → 160 | 756 m ² |
|  | Adelgade 11-13 1304 København K |  | 86 kWh/m ² |  89 kWh/m ² → 86 | 5.653 m ² |
|  | Amaliegade 44 1256 København K |  | 71 kWh/m ² |  77 kWh/m ² → 71 | 9.558 m ² |
|  | Asiatisk Plads 2 1402 København K |  | 109 kWh/m ² |  110 kWh/m ² → 109 | 35.353 m ² |
|  | Bredgade 59 1206 København K |  | 179 kWh/m ² |  165 kWh/m ² → 179 | 4.172 m ² |

CURRENT PRACTICE

Data maturity levels:

- Electricity: national datahub
- Heating: ? (mixed picture)
- Water: ? (backlog)

Energy efficient building operation requires efficient consumption data!

Karl et al. (2019)

ISSUES AND POTENTIALS

- **Utility companies have data, but the building owners do not**
- **Lack of act on data**
- **Building operation according to customer needs/usage patterns**

THANK YOU
